PRECISION PANELS. READY TO RUN.

At NWH, we don't just supply lumber, we deliver solutions to your challenges with components designed to move seamlessly through your operation. Our Elkhart CNC capabilities help you build faster, reduce complexity, and deliver a better end product.

Built to Handle More and Deliver More

- 60" x 120" oversized processing table
- Single-head CNC (2D machining)
- Large panel capability with overhang + flip processing
- Two-step machining: panel saw + CNC finishing
- Tight tolerance, repeatable precision
- Variable speed head for material flexibility

The Value of Added Flexibility

- Quick switch/changeover times
- Custom packaging to your specifications
- Stretch-wrapped for clean, dry delivery
- Mixed products in a single shipment
- Flexible freight options: van, flatbed, or rail
- Short, dependable lead times

What This Means for You

Faster Turnarounds

Expanded capacity and automation keep your production on schedule.

Consistent Quality

Every component is cut to spec for reliable fit and finish.

Production Efficiency

Ready-to-use parts reduce labor cost, streamline workflows, and simplify assembly.

Sustainability Gains

Less waste. Lower energy use.
Smarter manufacturing.

C.R. Onsrud 193G Pro Series CNC Router
